

“Through my work I try to communicate my appreciation of a an environment, how that space (natural or man-made) comes together, and how the viewer interacts with it...”.

Alex Roberts has an innate ability to quite literally sense the essence of a space, out of which she then creates her artwork.

The introduction and subsequent working relationship with Bringle Prandon Architects last year, created an ideal opportunity to develop this fascination within the Standard Chartered Bank project. The vibrant creations brightened up the existing location providing a welcoming, contemporary area within the larger scheme.

Working direct with the artist has been a refreshing experience for a variety of clients. Thus enabling the artist to interpret the clients vision into an exciting reality but with not forgetting the added elements of originality and imagination! Her client list includes Marco Pierre White, SCB London and Hong Kong, Freshfields Bruckhaus Derringer, Olympia London plus a number of private individuals based in the UK and abroad.

For further information regarding Alex’s artwork or forthcoming projects please contact her on
